

*Just Light is your Energy Solution Expert.
Empowering business your way.*

“EMPOWER YOUR WAY WITH All-in-one ENERGY SOLUTIONS”

- Providing the most cost-efficient energy solutions.
- Integrating with IoT platform to achieve better energy management.
- Assisting applications of rebate programs to cut down on project cost.

Just Light Technology is a green building energy solutions provider. Empower your business with cutting-edge IoT system and energy solutions to help building cutting down energy cost. You can take advantage of our IoT platform to integrate our solutions such as Solar, Smart Lighting and HVAC into one user interface, achieving a total Energy Management System (EMS) for any buildings.

Our Services

We are dedicated to offering the most innovative & efficient systems, with the goal of zero carbon emissions. Additionally, we are here to make sure that our clients can achieve true green buildings, with fully customizable energy solutions according to each client's specific needs.

Smart Lighting

Just Light integrates the most intelligent lighting control system with IoT architecture and LED lighting solutions, effectively cut down energy costs by up to 50-90%.

HVAC Solution

Optimizing HVAC system and providing the most cost-efficiency solution can not only lower the cost of energy usage, but also enhanced comfort, productivity of building's interior.

Solar Energy

Just Light provides a variety of solar panel applications integrating with IoT platform, easily monitor the status of the solar system using the same IoT platform as the lighting system.

Window Film

By applying a window film to a building's window and blocking the sun radiation, interior heat flux can be prevented, thus achieving better energy efficiency and carbon reduction.
