

# Portable UVC Sterilization Light

# Appearance

## Parameter

Model: USL-3W

Name: Portable UVC Sterilization Light

Material: ABS

External interface: 1 USB port

Product Size: 50x50x100 MM

Box Size: 55x55x105 MM

Watt: 2.5W

Voltage: DC 5V

Battery Capacity: 800mAh

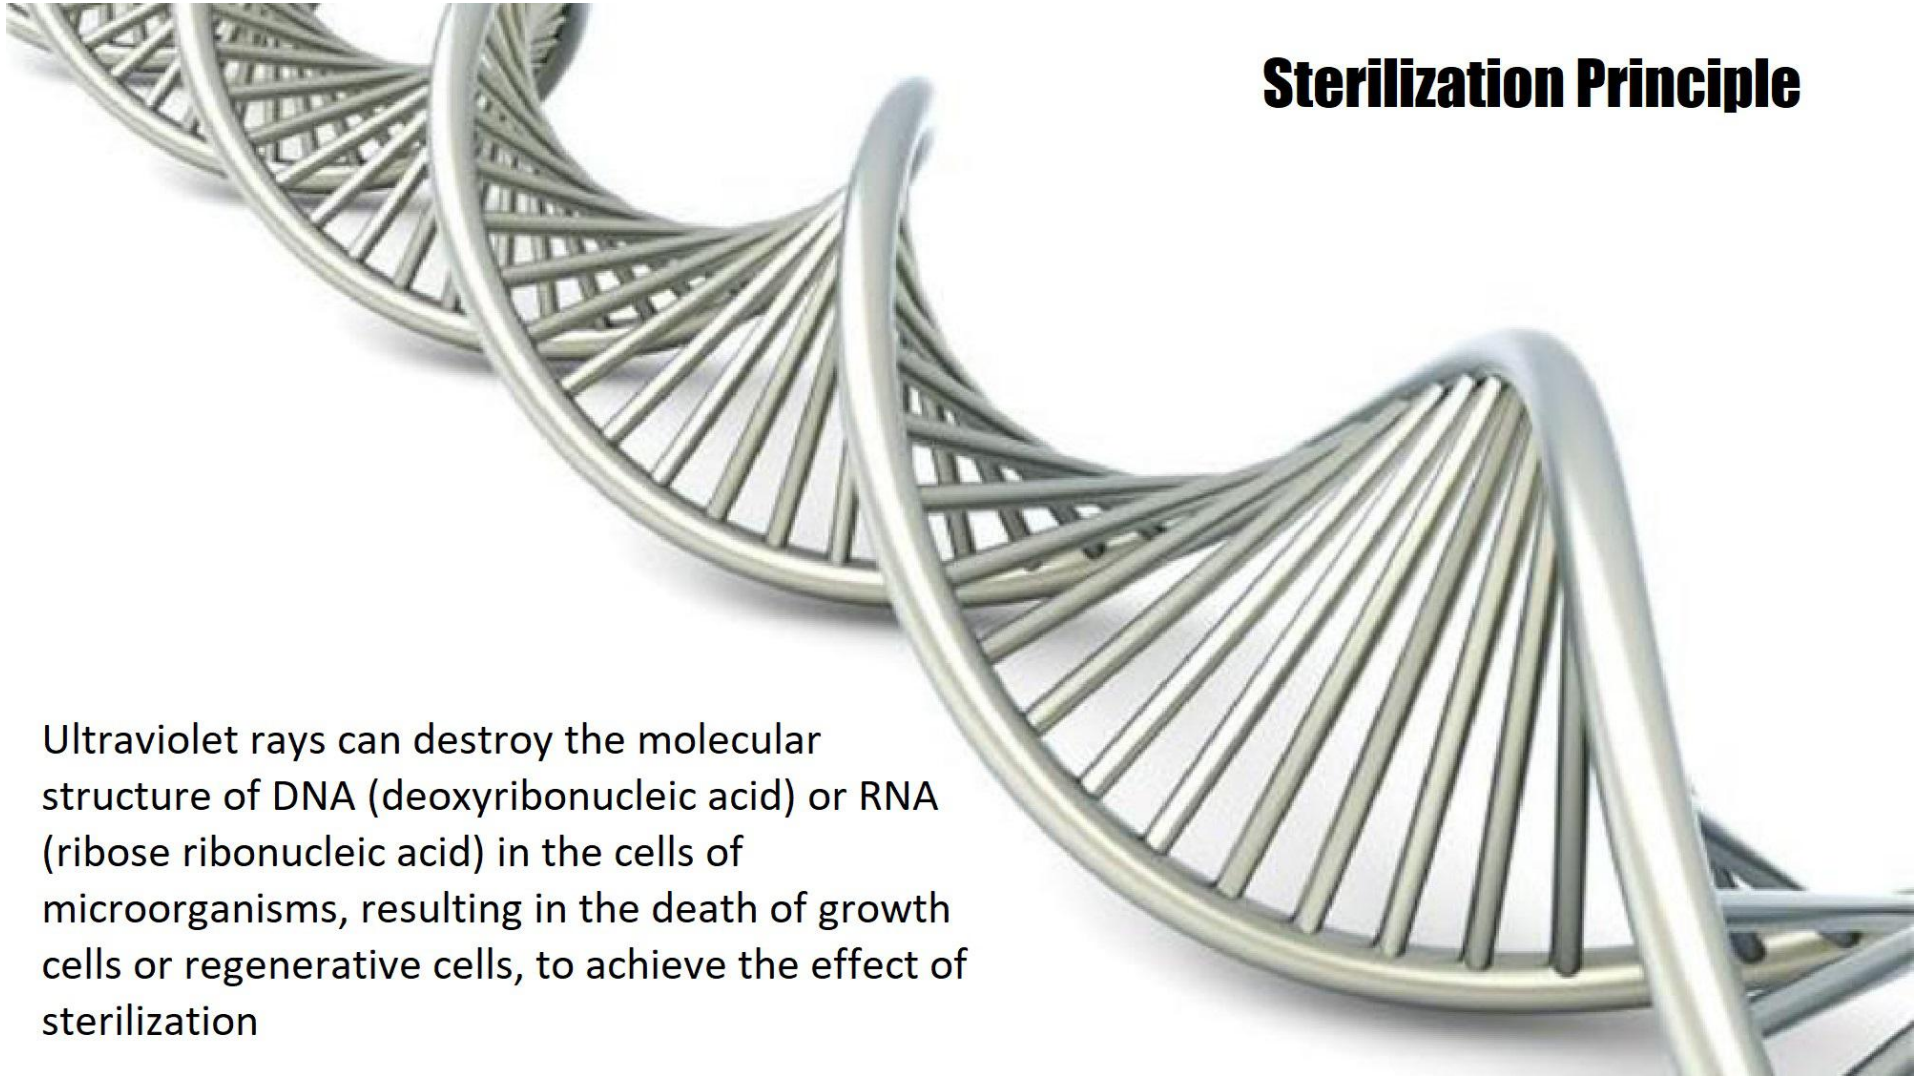

Sterilization Area: 2 sq.m.

Working Temps: 0-40°C

Working Humidity: 10%-90%

## **Sterilization Principle**

Ultraviolet rays can destroy the molecular structure of DNA (deoxyribonucleic acid) or RNA (ribose ribonucleic acid) in the cells of microorganisms, resulting in the death of growth cells or regenerative cells, to achieve the effect of sterilization

# Instructions

1: Startup: After pressing and holding the switch button for 3 seconds, the backlight of switch button flashes. After 30 seconds, the UVC sterilization light lights up to start sterilization. The light automatically shuts down after 15 minutes of sterilization

2: Shutdown: Press the switch button lightly, the backlight of the switch button goes out or the UVC sterilization light goes out, and the sterilization can be stopped.

## **Applicable Occasions**

**It's applicable to the area below 2 sq.m.**

# Office Area

**Corner of Living room**

**Bathroom**

# Wardrobe

# Refrigerator

**Automotive interior**
